

A universal dry ridge and hip system.

The Klobber Dry Ridge Kit is a universal ventilating dry ridge and hip system with a choice of ridge seals to cover most applications. The seal with lugs is best suited to concrete ridge tiles for ease of installation where the seal without lugs offers a more universal solution which will work with most concrete ridge tiles and when used alongside the clay conversion kit will accommodate a smaller 300mm ridge tile. Available with a black ridge roll, it comes in a practical all in one kit.

Typical section

Ridge detail with half round ridge tiles

Features and benefits

- Mortar free, making it quick to install.
- Choice of ridge seals, with, and without fixed lugs for easy application.
- Ventilated ridge roll with stainless steel fixings.

Area of application

- Option for most ridge tiles.
- Suitable for flat and low profile tiles as defined by BS 8612.
- Can be used on hips, however trays and clips are not included (See table below).
- Suitable for new build and refurbishment.

Related products

- Flashing Glue PACCGGL*
- Ridge End Caps KR9772/KR9773.

Approvals and certifications

- Complies with BS 5250 for ventilation, BS 8612 for performance and BS 5534 for mechanical fixing.
- All products supplied by Klobber Ltd are covered by a 10 year guarantee against manufacturing defect.

* Recommended to help fix the butyl strip in damp conditions.
